### **DETAILED ACTION**

The examiner acknowledges a submission of the amendment filed on 1/17/2006. The changes to the specification and amendments to claim 1 have been accepted.

The previously made 112, first paragraph rejection in regard to Claim 1 has been withdrawn in view of the amendment made to claim 1 (See Remarks, Pages 5-6).

The previously made 112, first paragraph rejection in regard to Claim 2 has been withdrawn in view of the applicants remarks (See Remarks, Page 6).

### ***Response to Arguments***

Applicant's arguments, see pages 6-8, filed 1/17/2006, with respect to Claims 1-4 have been fully considered and are persuasive. The previously made rejections of claims 1-4 has been withdrawn in view of the arguments and amendments to claim 1.

### ***Allowable Subject Matter***

Claims 1-4 are allowed.

Claim 1 recites the limitation of a an enable transistor which is biased in a nonconductive state with a second gate voltage which is obtained from a back biased powr supply line which is separate from an external power supply line.

Although Ye et al. (US 6,329,874) teaches an enable transistor which is biased in a nonconductive state with a second gate voltage, the gate voltage is obtained from the external power supply line. Prior art fails to teach the biased gate voltage obtained from a separate external power supply line.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
